Overview: Sober Living Services is a privately owned and operated “Sober Living” facility dedicated to providing an affordable, alcohol- and drug-free environment for men that are genuinely searching for help in overcoming their disease. SLS promotes individual recovery by providing an environment that allows the residents to develop their own personalized recovery programs. All clients are treated with respect and build confidence in their ability to recover while staying at the facility. All residents are required to be financially self-supporting, paying their own rent, and purchasing their own food. The residents are required to work (minimum 30 hours per week) or be actively seeking employment. Those residents who are permanently disabled and on federal, state or local assistance are required to become involved in service work. In keeping with the positive aspects of recovery, all residents are required to actively participate in a 12-step program (NA, AA), attend weekly house meetings, complete a daily assigned house chore, and pass random drug screens. Residents will not only learn to ask for help, they will gain self-respect while helping others. We believe that anyone with an open, willing and honest attitude is capable of recovery with the appropriate support and treatment.
